To the U.S.Gov't:

Please "get off the back of Bill Gates". Because of Bill Gates and the "Windows" operating system, he has made available to the common man and senior citizens in particular, the wonders of the internet and computers in general. He has provided many jobs for many people and is blessing to America. That is what America is - most anybody can succeed if they work hard and have a little sense.

Those who are complaining don't really care about the rest of us - they only care that someone else is making more money than them and are jealous they didn't create windows first.

Thank you.
